The Intention of this Chart is to distinguish in a manner immediately obvious to Sight, the several Tenures, as well as the Mode of Descent, and Powers of Alienation of Lands in England, with the several Alterations they have incurred during a Course of more than 700 Years. To this End the Tenures are represented by coloured Columns, the Connections, Alterations, and Lengths of the Tenures they represent, as it was extended; every Alteration throughout the whole precisely corresponding in Distance from the Bottom of the Chart, with that Part in the Scale of Reigns, which marks the Time wherein the Alteration signified is first known to have existed; which Correspondence is shewn by Lines crossing the Chart from Side to Side, and its Propriety laid open to a scrupulous Examination by means of the References carefully annexed to every Alteration which occurs.
